

Protective cup rectangular 33 x 46 mm for hot-air rework - JBC P2672

Item no. WL23249

Manufacturer JBC

Rectangular protective cup measuring 33 x 46 mm for JBC hot-air repair stations. Concentrates the hot air on the target component and protects adjacent parts during SMD desoldering and soldering.

TECHNICAL DATA

Country of Manufacture **Spain**

HS-Code **85159080900**

Weight **0.1 kg**

DESCRIPTION

When desoldering and soldering SMD components with a hot-air station, the hot air must be directed precisely onto the target component without overheating its neighbours. This rectangular protective cup with an inner size of 33 x 46 mm channels the air flow onto the component and shields the surrounding area thermally.

BENEFITS

- Inner size 33 x 46 mm, matched to the component to be desoldered
- Concentrates the hot air on the desired area and shortens process time
- Protects adjacent components and tracks from thermal stress
- Shape without tripod, can be combined with a tripod to lift the component off cleanly
- Suitable for JBC hot-air repair stations

TECHNICAL DATA

Item no.	WL23249
Model	0002672 / P2672
Manufacturer	JBC
Manufacturer item no.	P2672
Shape	rectangular

Dimensions (inner)	33 x 46 mm
Dimensions with packaging (LxWxH)	75 mm x 75 mm x 25 mm
Sales unit	piece

APPLICATIONS

Desoldering and soldering of SMD and QFP components, rework and repair on populated PCBs in electronics manufacturing, laboratories and service.

COMPATIBILITY AND SCOPE OF DELIVERY

Suitable for JBC hot-air repair and rework stations. Supplied as a single piece, without tripod. Select the cup size to match the component; use with a tripod if required.

Made by JBC, country of origin Spain. RoHS compliant.
