

LED Module Pure White 6000 K, Spot 10°, 21 mm - Starlight 100-006420

Item no. STL-100-006420

Manufacturer Starlight

LED module with pure white light (6000 K) and a 10° spot optic in a 21 mm size. Produces tightly focused, bright light and extends the StarLight modul-LED system for pinpoint illumination.

TECHNICAL DATA

Colour	White
Weight	0.1 kg

DESCRIPTION

The LED module delivers pure white light at 6000 K colour temperature with a tightly focused 10° spot optic. Its compact 21 mm size makes it a flexible building block of the StarLight modul-LED system for pinpoint illumination.

BENEFITS

- Pure white light at 6000 K for neutral, bright illumination
- Spot optic 10° for tightly focused, directional light
- Compact 21 mm size
- Part of the modular StarLight modul-LED system

TECHNICAL DATA

Light colour	pure white
Colour temperature	6000 K
Optic	Spot (10°)
Size	21 mm
Model	100-004414 / 100-006420
Manufacturer	STARLIGHT
Manufacturer part no.	100-006420

APPLICATIONS

Suited to microscopy, inspection, assembly and quality control where pinpoint, bright illumination is required.
