

## Integrated circuit board holder for PCT-100 preheater, 230 V - Oki BH-010

Item no. WL24506

Manufacturer Oki

A holder mounted on the preheater itself saves bench space and always keeps the assembly at the same distance from the heating surface. The Oki BH-010 integrates into the 230 V version of the PCT-100 preheater and fixes the board reproducibly above the convection zone. That simplifies recurring rework tasks on identical assemblies.

### TECHNICAL DATA

Weight

0.1 kg

### DESCRIPTION

Anyone preheating the same assemblies repeatedly does not want to realign the board every time. The Oki BH-010 integrated board holder mounts on the PCT-100 preheater and sets the distance to the heating surface reproducibly.

### BENEFITS

- Genuine Oki accessory for the PCT-100 preheater series
- Integrated design, no additional bench space required
- Reproducible distance between board and convection zone
- Secure hold of the assembly during preheating and rework
- Version matched to the preheater with 230 V heating element

### TECHNICAL DATA

|                          |                          |

| Item number              | WL24506                  |
| Model                    | BH-010                   |
| Manufacturer             | OKI                      |
| Manufacturer item number | BH-010                   |
| Product type             | Integrated board holder  |
| Suitable for             | PCT-100 preheater, 230 V |

## **APPLICATIONS**

Series rework on recurring assemblies, manual SMT and through-hole rework above the preheater and touch-up work where the board must stay in the same position throughout the heat-up phase.

## **COMPATIBILITY AND SCOPE OF DELIVERY**

Intended for the Oki PCT-100 preheater with 230 V heating element. For flexible positioning independent of the unit, the free-standing BH-100 holder is available. Scope of delivery: one BH-010 board holder, sales unit piece.
