

Bottle of cleaning sand for soldering tip cleaning - JBC CL6211

Item no. WL25115

Manufacturer JBC

Bottle of cleaning sand for gentle mechanical cleaning of soldering tips. It removes oxide and flux residue without attacking the tip tinning and keeps heat transfer consistent.

TECHNICAL DATA

Country of Manufacture Spain

HS-Code 85159080900

Weight 0.1 kg

DESCRIPTION

The cleaning sand CL6211 is used for the mechanical cleaning of soldering tips. Caked oxide and flux residue on the tip degrade heat transfer and wetting. The cleaning sand removes these residues gently without attacking the tinning and keeps the tip performing well.

BENEFITS

- Removes stubborn oxide and flux residue from the soldering tip
- Gentle on the tip tinning
- Maintains consistent heat transfer
- Simple to use in a suitable cleaning station

TECHNICAL DATA

Item no.	WL25115
Model	CL6211
Manufacturer	JBC
Manufacturer item no.	CL6211
Type	Cleaning sand
Order unit	Piece

APPLICATIONS

Regular cleaning of soldering tips at the workstation to maintain consistent soldering quality.

COMPATIBILITY AND SCOPE OF DELIVERY

For cleaning JBC soldering tips. Supplied as a bottle. Consumable.

Manufactured by JBC, Spain.
