

Chisel soldering tip 2.7x1 mm with integrated heater for T245 - JBC C245729

Item no. WL25513

Manufacturer JBC

Chisel-shaped C245 series soldering tip measuring 2.7 x 1 mm for the T245 soldering iron. The integrated heater brings the tip to working temperature within seconds and suits general soldering tasks.

TECHNICAL DATA

Ausführungsklasse	ESD (antistatic)
Country of Manufacture	Spain
HS-Code	85159080900
Serie	C245
Weight	0.1 kg

STANDARDS & COMPLIANCE

ESD safe IEC 61340-5-1

DESCRIPTION

The JBC C245729 chisel soldering tip covers most general soldering work on the T245 iron. With the heater built directly into the cartridge, heat is delivered right at the 2.7 x 1 mm chisel face and the temperature recovers quickly after each joint.

BENEFITS

- Heater integrated in the cartridge for very short heat-up and recovery times
- Chisel face 2.7 x 1 mm for pads, through-hole parts and general joints
- Tip length 10.5 mm for good reach on the board
- Sleep and hibernation via the stand to protect the tip
- Tool-free replacement on the T245 handpiece

TECHNICAL DATA

Model	C245-729
Manufacturer part no.	C245729
Item no.	WL25513

Tip series	C245
Tip shape	chisel
Tip dimensions	2.7 x 1 mm
Tip width	2.7 mm
Tip length	10.5 mm
Total length	100 mm
Integrated heater	yes
Compatible handpiece	T245 (formerly AD-2245)

APPLICATIONS

General hand and rework soldering of through-hole and larger SMD joints, tinning of pads and stranded wire.

COMPATIBILITY AND SCOPE OF DELIVERY

Fits the JBC T245 soldering irons (T245-A and variants). Supplied as one piece. Cartridge with tip and heater as a single unit.

ESD safe to IEC 61340-5-1. Made in Spain.
