

Replacement filter for desoldering iron DS360-A, 5 pieces - JBC 8473

Item no. WL25836

Manufacturer JBC

Genuine replacement filter for the JBC DS360-A desoldering iron, supplied as a pack of 5. Regular filter changes keep suction constant during desoldering and protect the iron from solder residue.

TECHNICAL DATA

Country of Manufacture **Spain**

HS-Code **85159080900**

Weight **0.1 kg**

DESCRIPTION

The JBC 8473 is the replacement filter for the DS360-A desoldering iron. The filter retains the drawn-in solder and fumes and protects the inside of the iron. A spent filter reduces suction, so timely replacement keeps full vacuum. The pack of 5 ensures a supply.

BENEFITS

- Genuine part for correct fit and full DS360-A suction
- Retains drawn-in solder and fumes and protects the iron
- Supplied as a pack of 5 as a consumable stock

TECHNICAL DATA

Model	0008473
Manufacturer part no.	0008473
Item no.	WL25836
Order unit	pack
Content unit	5 pieces
Fits	DS360-A

APPLICATIONS

Wear and consumable part for routine filter changes on the JBC DS360-A desoldering iron.

COMPATIBILITY AND SCOPE OF DELIVERY

Fits the JBC DS360-A desoldering iron. Supplied as a pack of 5. Made in Spain.
