

## Soldering tip cylindrical 3.65 mm for T470 - JBC C470-033

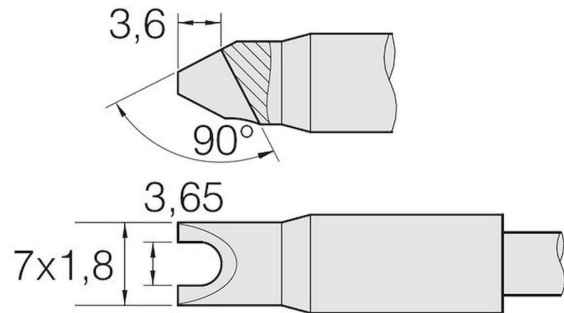

Item no. WL26084

Manufacturer JBC

Cylindrical special soldering tip of the C470 series with 7 x 1.8 mm tip size and a 3.65 mm notch for outer conductors of housing couplers. Integrated heater for use up to 500 C with the HDE supply unit.

### TECHNICAL DATA

|                        |                         |
|------------------------|-------------------------|
| Ausführungsklasse      | <b>ESD (antistatic)</b> |
| Country of Manufacture | <b>Spain</b>            |
| HS-Code                | <b>85159080900</b>      |
| Serie                  | <b>C470</b>             |
| Temperature (max.)     | <b>bis 500 °C</b>       |
| Weight                 | <b>0.1 kg</b>           |

### STANDARDS & COMPLIANCE

ESD safe IEC 61340-5-1

### DESCRIPTION

Soldering outer conductors on housing couplers needs a special tip geometry and high sustained temperature. The cylindrical JBC C470-033 with its 3.65 mm notch is a special soldering tip for exactly this task and works up to 500 C with the HDE supply unit.

### BENEFITS

- 3.65 mm notch designed specifically for outer conductors of housing couplers
- Use up to 500 C with the HDE supply unit (formerly HD-4700)
- High thermal mass thanks to 7 x 1.8 mm tip size for massive joints
- Integrated heater for direct heat transfer at the joint
- Straight tip alignment for targeted work

| Max. operating temperature | up to 500 C |
| Tip alignment              | straight    |
| Integrated heater          | yes         |
| Order unit                 | piece       |

## APPLICATIONS

Soldering and repairing outer conductors on housing couplers and similar massive connections with high heat demand.

## COMPATIBILITY AND SCOPE OF DELIVERY

Suitable for the JBC T470 soldering iron with the HDE heavy-duty supply unit (formerly HD-4700).  
Supplied as a single tip.

Made in Spain, ESD-safe for use in areas protected to IEC 61340-5-1.
