

Extraction arm kit 1WF Easy-Click 60 with bevelled nozzle, 1000 mm reach - Weller T0053657299N

Item no. WL26214

Manufacturer Weller

A complete extraction arm set for one workstation: flexible Easy-Click 60 arm with 60 mm tube diameter, 1000 mm reach and a bevelled FT-NL nozzle that can be positioned flat above the assembly. A shut-off valve with throttle and a table clamp set are included, as is a 3 m flexible extraction hose. That makes one position on a multi-operator unit ready to run.

TECHNICAL DATA

Weight

0.1 kg

DESCRIPTION

An extraction arm only works if the nozzle sits close to the solder joint and the air volume per position stays adjustable. Kit 1WF delivers exactly that combination: an Easy-Click 60 arm with 60 mm tube diameter and 1000 mm reach, a bevelled FT-NL nozzle and a shut-off valve with throttle for balancing the individual bench.

BENEFITS

- Bevelled FT-NL nozzle can be guided flat over the board and captures the fume at source
- 1000 mm reach covers a full workstation without repositioning the unit
- Throttle in the shut-off valve, so the air volume of each position on a multi-operator unit can be balanced
- Easy-Click connection, arm and hose plug together without tools
- Table clamp set included, mounting without drilling into the bench top

TECHNICAL DATA

Item number	WL26214
Model	T0053657299
Manufacturer	Weller
Manufacturer item number	T0053657299N

Tube diameter	60 mm
Reach	1000 mm
Mounting	Table mounting
ESD safe	no
Order unit	Piece

APPLICATIONS

Capturing solder fume at hand soldering and rework benches, adding another position to an existing multi-operator extraction unit, and extraction at bonding or dispensing stations with a localised fume source.

COMPATIBILITY AND SCOPE OF DELIVERY

Designed for the Weller Easy-Click 60 system. Scope of delivery: shut-off valve with table clamp set T0053657499, flexible extraction hose 3 m 7003051ESD, extraction arm D 60 mm, 1 m long 0F10, and bevelled nozzle FT-NL.
