

Coupling 5.6 mm for BTX-208 extraction unit, pack of 4 - Oki AC-TX001-4

Item no. WL27877

Manufacturer Oki

A worn or missing hose coupling on the BTX-208 extraction unit lets false air in and the capture rate at the soldering point drops. The AC-TX001-4 coupling restores a tight connection with two 5.6 mm screw connections. It is supplied as a pack of 4, so several workstations can be serviced in one go.

TECHNICAL DATA

Weight

0.1 kg

DESCRIPTION

Replacement coupling for the Oki BTX-208 solder fume extraction unit. It joins the extraction hose to the unit and carries two 5.6 mm screw connections, so the joint stays tight even with frequent reconnection and the airflow at the fume source is maintained.

BENEFITS

- Two 5.6 mm screw connections for a secure, low-leakage hose joint
- Original Oki accessory, dimensionally matched to the BTX-208 extraction unit
- Pack of 4 as stock for several extraction arms or workstations
- Quick change with minimal tooling and no intervention in the unit
- Keeps the specified extraction performance at the soldering point

TECHNICAL DATA

Item number	WL27877
Model	AC-TX001-4
Manufacturer	OKI
Manufacturer item number	AC-TX001-4
Screw connections	2 pieces, 5.6 mm
Order unit	PU

Content unit	4 pieces
Weight	0.1 kg

APPLICATIONS

Maintenance of solder fume extraction in electronics manufacturing, repair shops and laboratories. Typical uses are workstation rebuilds, replacing worn hose ends or holding spares for scheduled servicing.

COMPATIBILITY AND SCOPE OF DELIVERY

Intended for the Oki BTX-208 extraction unit and its hose system with 5.6 mm screw connection. Scope of delivery: 4 couplings AC-TX001-4.
