Execution	TEC

STANDARDS & COMPLIANCE

ESD safe

DESCRIPTION

For cutting and recutting internal threads by hand. The ground HSS-G tap cuts evenly and delivers a dimensionally accurate thread to standard, guided by the square drive in a tap wrench.

Key benefits

- Material HSS-G, ground for clean cutting quality
- For through and blind holes depending on version
- Square drive for tap wrenches and tool holders
- For readily machinable materials up to around 900 N/mm²

Technical specifications

Standard version to DIN, ground HSS-G. Set grading on multi-piece sets for step-by-step thread forming.

Applications

Workshop, assembly, maintenance and repair. Cutting new threads and recutting damaged threads by hand.
