

SMD-Entlötpitze C245 Micro Stick Switch für T245 - JBC C245-136

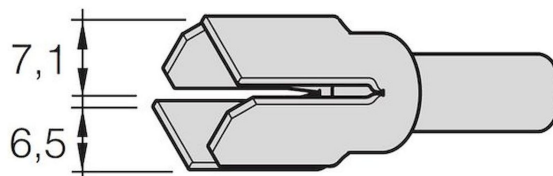

Item no. WL28382

Manufacturer JBC

JBC C245 series SMD desoldering tip in the Micro Stick Switch form for desoldering small SMD components. The integrated heater delivers heat right to the joint. Fits the T245 soldering iron.

TECHNICAL DATA

Ausführungsklasse	ESD (antistatic)
Country of Manufacture	Spain
HS-Code	85159080900
Serie	C245
Weight	0.1 kg

STANDARDS & COMPLIANCE

ESD safe IEC 61340-5-1

DESCRIPTION

For targeted desoldering of small SMD components with short leads or switch contacts. The Micro Stick Switch shape of the C245 series reaches the joints precisely, while the heater integrated right at the tip provides fast and constant heat transfer.

BENEFITS

- Micro Stick Switch form for targeted desoldering of small SMD components and switch contacts
- Heater integrated right at the tip for fast thermal response with no heat loss
- Total tip length of 100 mm for good reach on the assembly
- Tool change without cooling down, as tip and heating cartridge form one unit
- Compatible with the fine temperature control of the JBC T245 platform

TECHNICAL DATA

Item number	WL28382
Manufacturer item number	C245136
Model	C245-136

Product / tip series	C245
Tip shape	Micro Stick Switch, SMD desoldering tip
Total tip length	100 mm
Integrated heating	yes
Suitable soldering iron / handpiece	T245
Dimensions with packaging (LxWxH)	110 x 12 x 12 mm
Order unit	piece

APPLICATIONS

Suitable for desoldering small SMD components, switch contacts and fine rework on densely populated boards.

COMPATIBILITY AND SCOPE OF DELIVERY

Fits the JBC T245 soldering iron (formerly AD-2245) and all JBC stations that drive the T245 handpiece. Supplied as a single piece.

ESD safe to IEC 61340-5-1. Made in Spain. CE, RoHS.
