

Extraction hose flexible 40 mm sold per metre - Weller T0053641400

Item no. WL28404

Manufacturer Weller

Every extraction system has its own run between the unit and the bench. This flexible Weller extraction hose of 40 mm diameter is sold by the metre so the line can be cut exactly to the installation. It is supplied without a connecting piece, matching connectors are available separately.

TECHNICAL DATA

Weight

0.1 kg

STANDARDS & COMPLIANCE

ESD safe IEC 61340-5-1

DESCRIPTION

When building a solder fume extraction system the hose length decides the pressure drop and therefore the capture rate at the nozzle. This flexible Weller hose of 40 mm diameter is supplied by the metre and can be matched to the actual run without waste.

BENEFITS

- 40 mm diameter, matched to the Weller hose and duct range of this nominal size
- Sold by the metre, no fixed length and no unnecessary offcuts
- Flexible construction that follows corners and bench edges without kinking
- Can be completed with connectors, extraction arms and nozzles from the Weller accessory range

TECHNICAL DATA

Item number	WL28404
Model	T0053641400
Manufacturer	Weller
Manufacturer item number	T0053641400

Diameter	40 mm
Order unit	m
Range	1000 mm
ESD safe	no

APPLICATIONS

Connecting line between extraction unit and extraction arm or funnel nozzle at hand soldering benches, bonding stations and in central extraction systems. Also used to replace damaged hose sections in existing installations.

COMPATIBILITY AND SCOPE OF DELIVERY

For Weller extraction systems of 40 mm nominal size. Supplied without a connecting piece, the matching connector and clamps are ordered separately. The hose is not declared ESD safe and is therefore not intended for EPA areas to IEC 61340-5-1.
