

Vacuum cup kit 4 pieces 3/16", 1/4", 5/16", 7/16" - Oki HCTA-VC-KIT

Item no. WL31035

Manufacturer Oki

Lifting a desoldered component off the board only works cleanly when the cup matches the package size. The HCTA-VC-KIT holds four vacuum cups in 3/16", 1/4", 5/16" and 7/16", covering everything from small chips to large QFP bodies. Accessory set for the vacuum pickup equipment of Oki hot air and rework systems.

TECHNICAL DATA

Weight

0.1 kg

DESCRIPTION

In rework the final move decides the result: once the solder is molten the component has to come up vertically without sliding sideways. The Oki HCTA-VC-KIT supplies four vacuum cups in 3/16", 1/4", 5/16" and 7/16", so every package size has a suitable contact area.

BENEFITS

- Four cup sizes from 3/16" to 7/16" cover small chips through to large packages
- Pack of 4 pieces gives a ready to use range without single ordering
- Flexible cup face seats flat on the body and prevents tilting during lift-off
- Wear part set for restocking existing vacuum pickups

TECHNICAL DATA

Item number	WL31035
Model	HCTA-VC-KIT
Manufacturer	OKI
Manufacturer item number	HCTA-VC-KIT
Cup sizes	3/16", 1/4", 5/16", 7/16"
Pack unit	4 pcs
Weight	0.1 kg

APPLICATIONS

Picking and placing SMD components during hot air desoldering, refitting single parts in repair work, handling delicate packages in prototyping and sample production.

COMPATIBILITY AND SCOPE OF DELIVERY

Accessory for the vacuum pickup equipment of Oki hot air and rework systems. Delivery comprises four vacuum cups in the sizes listed.
