

Sensor for TI-A temperature meter - JBC STA-A

Item no. WL34269

Manufacturer JBC

Replacement or spare sensor for the JBC TI-A temperature meter (TI-2800). It picks up the temperature at the soldering tip and passes it to the meter. This keeps the station calibration verifiable.

TECHNICAL DATA

Weight 0.1 kg

DESCRIPTION

The STA-A is the measuring sensor for the JBC TI-A temperature meter (TI-2800). It reads the temperature at the soldering tip and sends the readings to the meter so the set station temperature can be checked regularly.

BENEFITS

- Exact fit sensor for the TI-A temperature meter
- Reads the tip temperature for regular checks
- Replacement for a worn or damaged sensor

TECHNICAL DATA

Item no.	WL34269
Model	STA-A
Manufacturer	JBC
Manufacturer item no.	STA-A

APPLICATIONS

Regular checking of the tip temperature on soldering stations with the TI-A temperature meter (TI-2800).

COMPATIBILITY AND SCOPE OF DELIVERY

Suitable for the JBC TI-A temperature meter (TI-2800). Supplied as a single sensor.

Made in Spain.
