DESCRIPTION

The Antistatic Fit Glove is a knitted glove made of nylon with a knitted-in copper fiber. The conductive fiber dissipates charge and makes the glove suitable for handling static-sensitive components.

BENEFITS

- antistatic thanks to knitted-in copper fiber
- good fit and tactile feel
- suitable for cleanroom class 1000

TECHNICAL DATA

- Material: nylon with copper
- Cleanroom class: 1000
- Size: XL
- Model: HSAXL10KK
- Pack: 10 pairs

APPLICATIONS

Electronics assembly, circuit board production and cleanroom work requiring charge dissipation.
