

Mounting block for AP130 and AP250 handpieces - JBC 14706

Item no. WL34571

Manufacturer JBC

Mounting block for the JBC AP130 and AP250 solder feed handpieces. The position is adjustable and the stand triggers the sleep and hibernation mode of the station. Suitable for the CF and CA solder feed stations.

TECHNICAL DATA

Weight 0.1 kg

DESCRIPTION

The 14706 mounting block holds the JBC AP130 and AP250 solder feed handpieces safely in the stand. The position is adjustable and placing the iron switches the station into sleep and hibernation mode, which spares the tip and saves energy.

BENEFITS

- Funnel style holder for irons with a solder wire feeder
- Adjustable position for ergonomic placement
- Triggers the sleep and hibernation mode of the station
- Suitable for the AP130 and AP250 handpieces
