

Funnel nozzle transparent Easy-Click, width 230 mm - Weller ALFA-T

Item no. WL35618

Manufacturer Weller

When a whole assembly gives off fume rather than a single joint, a small round nozzle is not enough. The ALFA-T funnel nozzle covers a wide capture area of 230 mm by 100 mm and stays transparent, so the view of the workpiece is not lost. Its Easy-Click connection fits flexible and articulated extraction arms.

TECHNICAL DATA

Colour	Transparent
Weight	0.1 kg

DESCRIPTION

Rework on larger assemblies or bonding work releases fume across a wide area. The transparent ALFA-T funnel nozzle covers that area with a 230 mm width and 100 mm height and attaches to the extraction arm through the Easy-Click connection without tools.

BENEFITS

- Capture width of 230 mm at 100 mm height for area sources instead of spot extraction
- Transparent material keeps the view of component and solder joint clear
- Easy-Click mount for fast nozzle changes without tools
- Suitable for flexible extraction arms and articulated arms alike
- Light construction, the arm stays stable even fully extended

TECHNICAL DATA

Item number	WL35618
Model	ALFA-T
Manufacturer	Weller
Manufacturer item number	ALFA-T
Order unit	Piece
Width	230 mm

Height	100 mm
Version	Funnel nozzle, transparent
Connection	Easy-Click

APPLICATIONS

Rework and repair on larger circuit boards, bonding and dispensing, cleaning with solvent based media and test benches with fume or vapour across an area. It also works as area extraction above a tray or a placement zone.

COMPATIBILITY AND SCOPE OF DELIVERY

Suitable for flexible and articulated extraction arms with Easy-Click mount. For attachment to an aluminium extraction arm without a flexible extraction hose, Adapter Z is required. Supplied as one funnel nozzle, extraction arm, adapter and extraction unit are ordered separately.
