

Capacitor Cover for 106R Compressor Pump - Jun-Air K1042

Item no. JUN-K1042

Manufacturer Jun-Air

The genuine K1042 cover closes the capacitor area of the Jun-Air 106R pump. It keeps dust from the cooling airflow away from the capacitor and protects the live terminals from contact.

TECHNICAL DATA

Weight **0.2 kg**

DESCRIPTION

On the 106R the capacitor sits in the cooling air zone, so dust settles there quickly. A cover that has cracked or gone missing after a repair leaves terminals exposed and speeds up contamination. The genuine K1042 cover restores the closed condition.

BENEFITS

- Contact protection for the capacitor terminals at 230 V
- Keeps dust and debris away from the capacitor and its terminals
- Fits the existing mounting points on the pump without rework
- A sensible companion to a capacitor change, as the old cover often breaks during removal

TECHNICAL DATA

Jun-Air part number	K1042
Lancier part number	110554.000
Type	Capacitor cover, spare part
Fits	106R compressor pump and units built on it
106R pump	133 l/min displacement, 44 l/min at 8 bar, 70 dB(A), 230 V / 50 Hz
Version	Genuine Jun-Air spare part
Condition	New

COMPATIBILITY

For the 106R pump in both pressure versions and for the units 106R-25B, 2x106R-40B, 106R-25BQ2,

106R-25M, 2x106R-40M, 106R-25MQ2 and 2x106R-40MQ2. The matching capacitor kit is K1041.

APPLICATION

Ordering it together with capacitor kit K1041 completes the service call in one pass. In cabinet units with limited air exchange it also pays to check the intake filter, for which kit K1038 is intended.
