

Plug-on temperature and humidity sensor for MetrISO 3000 - Warmbier 7100.3000.TF

Item no. WL36226

Manufacturer Warmbier

Plug-on temperature and humidity sensor with RS232 interface, exclusively for the MetrISO 3000 resistance meter. Captures ambient conditions directly during ESD measurement.

TECHNICAL DATA

Country of Manufacture **Germany**

Sales unit **1 Stück**

Weight **0.1 kg**

STANDARDS & COMPLIANCE

ESD safe

DESCRIPTION

The plug-on temperature and humidity sensor extends the MetrISO 3000 resistance meter with the capture of ambient conditions. Because resistance values depend strongly on temperature and humidity, measurements can be carried out in a documented and traceable way.

BENEFITS

- Captures temperature and relative humidity directly at the measuring point
- Data transfer via RS232 interface
- Simple plug-on fitting, no tools required

TECHNICAL DATA

- Function: temperature and humidity measurement
- Interface: RS232
- Compatibility: MetrISO 3000 only
- Selling unit: 1 piece

APPLICATION

Documentation of ambient conditions during resistance measurement in the EPA with the MetrISO 3000.
