DESCRIPTION

The A8 adsorption filter cassette (02.1.043) is the main filter for ULT extraction and filter units of the 220ex series (ACD 200 EX). It binds gaseous pollutants, vapours and odours from the extracted air stream by adsorption onto activated carbon, keeping clean air quality at the workplace constant.

BENEFITS

- Adsorption stage for binding gases, vapours and odours
- Main filter tuned specifically for the ACD 200 EX series
- Cassette design for quick, clean filter replacement
- Ensures continuous purification of the returned air
