

3-part extension rod with T-handle for measuring electrode Model 870 - Warmbier WL36616

Item no. WL36616**Manufacturer Warmbier**

Three-part extension set with insulated T-handle for the Model 870 measuring electrode. Allows convenient resistance measurement on floor systems while standing.

TECHNICAL DATA

Country of Manufacture **Germany**

Sales unit **1 Stück**

Weight **0.1 kg**

DESCRIPTION

The three-part extension set with insulated T-handle extends the Model 870 measuring electrode for measurement on floor systems. The extension allows measuring while standing, without having to bend down to the floor.

BENEFITS

- Three-part build for a flexible working length
- Insulated T-handle for safe, low-fatigue handling
- Designed specifically for the Model 870 electrode

TECHNICAL DATA

- Type: extension plus T-handle, 3-part
- Compatibility: Model 870 electrode only
- Selling unit: 1 piece (3 parts)

APPLICATION

Resistance measurement on floor coverings and floor systems while standing, using the Model 870 electrode.
