

Combined main and gas filter for AD Nano fume extraction unit - Bofa A1030191

Item no. WL36626

Manufacturer Donaldson Bofa

Original combined filter for the Bofa AD Nano fume extraction unit. Brings particle and gas filtration together in one element to capture solder fume and fumes. Sold per piece.

TECHNICAL DATA

Country of Manufacture **United Kingdom**

HS-Code **84219990**

Weight **0.1 kg**

DESCRIPTION

Combined main filter for the Bofa AD Nano solder fume extraction unit. It captures both airborne particulate and the gases and odours generated during soldering in a single filter element. Timely replacement maintains extraction performance and operator protection.

BENEFITS

- Genuine Bofa spare, an exact fit for the AD Nano series
- Combined particle and gas filtration in one element
- Protects operator and unit through regular replacement

TECHNICAL DATA

Manufacturer item no.	A1030191
Item no.	WL36626
Filter type	Main filter (combined)
Device series	AD Nano
Order unit	Piece

APPLICATIONS

- Solder fume extraction at manual workstations using the Bofa AD Nano

COMPATIBILITY

For the Bofa AD Nano series only.
