

ESD polyester swab, 3.0 mm head, flexible dissipative handle - Chemtronics 38040ESD

Item no. WL36640**Manufacturer Chemtronics**

Static-dissipative cleanroom polyester swab with a heat-sealed 3.0 mm head and acrylic-coated polypropylene handle with a flexible end. Dissipative for ESD-sensitive assemblies down to ISO 4.

TECHNICAL DATA

Ausführungsklasse **ESD (antistatic)**

Norm **IEC 61340-5-1**

Sales unit **500er Pack**

Weight **0.1 kg**

STANDARDS & COMPLIANCE

ESD safe IEC 61340-5-1

DESCRIPTION

The Coventry 38040ESD is the static-dissipative version of the narrow cleanroom polyester swab. The heat-sealed polyester head cleans with low residue, while the acrylic-coated polypropylene handle with a flexible end is static-dissipative and protects ESD-sensitive parts to IEC 61340-5-1.

BENEFITS

- Static-dissipative handle to protect ESD-sensitive parts
- Flexible handle end for working close to contours
- Heat-sealed polyester head, solvent- and acid-resistant

TECHNICAL DATA

- Head: polyester, heat-sealed
- Head width: 3.0 mm
- Handle: polypropylene, acrylic-coated, dissipative, flexible end
- Cleanroom class: ISO 4 to 7 (Class 10 to 10,000)
- Pack size: 500 pieces

STANDARDS AND COMPLIANCE

- Static-dissipative to IEC 61340-5-1

APPLICATIONS

Suitable for precise cleaning of tight spots on connectors, optics and circuit boards at ESD workstations in electronics and cleanroom production.
