

Combination filter cassette H13A main filter series 160 - ULT 02.1.562

Item no. WL37371

Manufacturer ULT

When the filter loading indicator of a LAS 160 or WSA-LR unit responds, this main filter is the part due for replacement. The H13A combination cassette carries an H13 particulate stage and an activated carbon stage in one housing, so it holds back solder fume particles and gaseous components together. It fits LAS 160 K, LAS 160 SK and WSA-10LR, WSA-20LR of the models up to 2016 and 2017.

TECHNICAL DATA

Weight 0.1 kg

STANDARDS & COMPLIANCE

EN 1822

DESCRIPTION

A solder fume extractor is only as clean as its main filter. This ULT H13A combination filter cassette replaces the spent main filter of the series 160 and combines H13 particulate separation with an activated carbon stage for the gaseous fraction of solder fume.

BENEFITS

- Particulate and gas filter stage combined in one cassette, no separate carbon container needed
- H13 filter class for the fine particles and rosin aerosols typical of soldering
- Tool-free cassette change, short downtime at the bench
- Defined as the main filter of the WSA-10LR and WSA-20LR device series
- Belongs to the replacement filters LAS 160.1 K and LAS 160.1 SK

TECHNICAL DATA

Item number	WL37371
Model	02.1.562
Manufacturer	ULT
Manufacturer item number	02.1.562

Order unit	piece
Filter type	main filter
Filter design	combination filter cassette H13A
Device series	WSA-10LR, WSA-20LR
Suitable for	LAS 160 K, LAS 160 SK
Related replacement filters	LAS 160.1 K, LAS 160.1 SK
Weight	0.1 kg

APPLICATIONS

Scheduled filter changes on solder and laser fume extraction units of the series 160 in electronics manufacturing, rework and laboratories. Replacement is due when the unit signals filter loading or when the airflow at the capture point drops noticeably.

COMPATIBILITY AND SCOPE OF DELIVERY

Fits LAS 160 K and LAS 160 SK as well as WSA10 and WSA20LR, both the models up to 2016 and the 2017 model. Belongs to the replacement filters LAS 160.1 K and LAS 160.1 SK. Scope of delivery: 1 H13A combination filter cassette.

The H13 filter class corresponds to the HEPA classification according to EN 1822.
