

Combined main filter for AD 250, AD 350 and V 600 extraction units - Bofa A1030055

Item no. WL38873

Manufacturer Donaldson Bofa

Original combined main filter for the Bofa AD 250, AD 350 and V 600 extraction units. Brings particle and gas filtration together to capture solder fume. Sold per piece.

TECHNICAL DATA

Country of Manufacture **United Kingdom**

HS-Code **84219990**

Weight **0.1 kg**

DESCRIPTION

Combined main filter for the Bofa AD 250, AD 350 and V 600 extraction units. It captures both airborne particulate and the gases and odours in solder fume in a single filter element. Timely replacement maintains extraction performance and operator protection.

BENEFITS

- Genuine Bofa spare for AD 250, AD 350 and V 600
- Combined particle and gas filtration in one element
- Protects operator and unit through regular replacement

TECHNICAL DATA

Manufacturer item no.	A1030055
Item no.	WL38873
Filter type	Main filter (combined)
Device series	AD 250, AD 350, V 600
Order unit	Piece

APPLICATIONS

- Solder fume extraction with Bofa AD 250, AD 350 or V 600

COMPATIBILITY

For the Bofa AD 250, AD 350 and V 600 series.
