

Adsorption filter cassette A18 main filter for ACD 300 - ULT 02.1.406

Item no. WL41159

Manufacturer ULT

Any particulate filter holds back dust, but not the sharp smell of flux and solvent. That is the task of the A18 adsorption filter cassette, which binds gaseous process components in its adsorption medium and serves as the main filter stage in ACD 300 series units. As a single element it belongs to the HFM A18 filter system.

TECHNICAL DATA

Weight 0.1 kg

DESCRIPTION

Soldering, bonding and cleaning release gaseous components alongside particles, and those cannot be separated mechanically. The ULT A18 adsorption filter cassette binds them in its adsorption medium, so this is the stage that decides whether the returned air stays odour free.

BENEFITS

- Binds gaseous and odour intensive process components that pass a particulate stage
- Designed as the main filter stage for units of the ACD 300 series
- Cassette format, therefore a quick exchange without modifying the unit
- Available separately as an element of the HFM A18 filter system
- Genuine ULT part with a defined fit in the filter compartment

TECHNICAL DATA

item number	WL41159
model	02.1.406
manufacturer	ULT
manufacturer item number	02.1.406
order unit	piece
filter type	main filter
filter designation	adsorption filter cassette A18

APPLICATIONS

Extraction of solder fume, adhesive and solvent vapours at manual and rework benches in electronics manufacturing as well as in laboratory and repair areas where the filtered air is returned to the room.

COMPATIBILITY AND SCOPE OF DELIVERY

For ULT extraction units of the ACD 300 series. The cassette is part of the HFM A18 filter system and is supplied as one cassette per order unit.
