STANDARDS & COMPLIANCE

EN 779

DESCRIPTION

The G4 Z-Line filter is the coarse-dust prefilter stage in your ULT extraction unit of the 300 series (ACD 300). The zig-zag Z-Line design provides a large filter area in a compact space and therefore a long service life before the downstream main filter becomes loaded. The spent filter is replaced individually.

BENEFITS

- Filter class G4 to EN 779 retains coarse dust and protects the main filter
- Z-Line pleating provides a large filter area and long service life in a compact space
- Exact fit for the ACD 300 device series, no modification needed
- Tool-free replacement reduces extractor downtime
