

Adsorption filter cassette A18 complete with prefilter for ACD 300 - ULT 02.1.405

Item no. WL41652

Manufacturer ULT

This version of the A18 ships as a complete assembly, meaning the adsorption cassette together with the upstream Z-Line G4 filter. That renews the entire main filter stage of an ACD 300 in one operation instead of hunting down two separate part numbers. Both elements remain available individually as ULT 02.1.470 and ULT 02.1.406.

TECHNICAL DATA

Weight 0.1 kg

DESCRIPTION

During scheduled maintenance of an ACD 300 the prefilter and the adsorption stage are usually renewed together. The complete A18 adsorption filter cassette bundles both elements into one order line, which shortens both procurement and downtime.

BENEFITS

- Complete main filter assembly consisting of the A18 adsorption cassette and the Z-Line G4 prefilter
- One order line instead of two, which simplifies maintenance planning and stock keeping
- Both stages are renewed together, so separation performance stays traceable
- Elements can be reordered individually as ULT 02.1.470 and ULT 02.1.406
- Genuine ULT part that seats accurately in the ACD 300 filter compartment

TECHNICAL DATA

item number	WL41652
model	02.1.405
manufacturer	ULT
manufacturer item number	02.1.405
order unit	piece
filter type	main filter

filter designation	adsorption filter cassette A18 complete
prefilter element	Z-Line filter G4, ULT 02.1.470
adsorption element	adsorption filter cassette A18, ULT 02.1.406
device series	ACD 300

APPLICATIONS

Scheduled filter replacement on ULT ACD 300 extraction units in electronics manufacturing, soldering and bonding as well as laboratory and repair areas with air recirculation.

COMPATIBILITY AND SCOPE OF DELIVERY

For the ULT ACD 300 series. The delivery comprises the complete cassette with the Z-Line filter G4 ULT 02.1.470 and the A18 adsorption filter cassette ULT 02.1.406.
