

Bent desoldering tip for QFP/PLCC 8 mm - JBC C420279

Item no. WL41675

Manufacturer JBC

Bent desoldering tip 8 mm with integrated heater for the JBC HT420 and AT420 thermal tweezers. Heats one full side of a QFP or PLCC package at once, sold individually.

TECHNICAL DATA

Ausführungsklasse	ESD (antistatic)
Country of Manufacture	Spain
HS-Code	85159080900
Serie	C420
Weight	0.1 kg

STANDARDS & COMPLIANCE

ESD safe IEC 61340-5-1

DESCRIPTION

The JBC C420279 is a bent desoldering tip with an 8 mm contact length and an integrated heater. It fits the JBC HT420 and AT420 thermal desoldering tweezers and is designed to heat a complete package side of QFP and PLCC components evenly, so the part lifts off without bending its leads.

BENEFITS

- Bent form for secure access to the sides of QFP and PLCC packages
- Contact length 8 mm heats a full lead row at once
- Heater integrated in the tip body for fast heat transfer and short warm-up
- Used as a pair in the tweezers for opposing package sides
- Available individually for targeted replacement or building a tip set

TECHNICAL DATA

Item number	WL41675
Manufacturer item number	C420279
Model	C420-279

Manufacturer	JBC
Tip series	C420
Tip application	for QFP/PLCC
Tip alignment	bent
Contact length	8 mm
Integrated heater	yes
Suitable handpiece	HT420, AT420
Order unit	piece

APPLICATIONS

Removing and reworking QFP and PLCC components and other SMD packages with leads on all sides in repair, rework and prototyping.

COMPATIBILITY AND SCOPE OF DELIVERY

Fits the JBC HT420 and AT420 desoldering tweezers. Supplied as a single tip without tweezers. Tips are used in pairs in the tweezers.

Genuine JBC tip, RoHS compliant, ESD safe to IEC 61340-5-1. Origin: Spain.
