

ESD floor mat with yellow leading edge for PGT120 pedestal - Warmbier WL42952

Item no. WL42952

Manufacturer Warmbier

Dissipative floor mat with a yellow leading edge for footwear testing at the PGT120 personnel tester. Fits the 1801.G.P.TERM pedestal and establishes the ground connection during the walking test. Supplied without footwear electrode.

TECHNICAL DATA

Ausführungsklasse	ESD (antistatic)
Colour	Yellow
Norm	IEC 61340-5-1
Sales unit	1 Stück
Weight	0.1 kg

STANDARDS & COMPLIANCE

ESD safe IEC 61340-5-1

DESCRIPTION

The 7100.PGT120.SM.TERM ESD floor mat forms the standing area for footwear testing at the Warmbier PGT120 personnel tester. The dissipative mat grounds the person during the test, while the yellow leading edge clearly marks the entrance.

BENEFITS

- Dissipative standing surface for footwear testing
- Highly visible yellow leading edge
- Fits the 1801.G.P.TERM pedestal

TECHNICAL DATA

- Model: 7100.PGT120.SM.TERM
- Version: floor mat with yellow leading edge
- Scope of supply: 1 floor mat without footwear electrode
- Selling unit: 1 piece

APPLICATION

Grounding mat for personnel and footwear testing at the EPA entrance.
