

Console 200.1 S75 for mounting an Alsident System 75 extraction arm - ULT 0200.1-CONSOLE.S75.01

Item no. **WL46536**

Manufacturer **ULT**

An extraction arm can only be carried on the extraction unit itself if a suitable mount is fitted. This console 200.1 S75 accepts an Alsident System 75 extraction arm and is mounted on extraction and filtration units of the ULT 200.1 series. Assembly material and tools for self-assembly are included.

TECHNICAL DATA

Weight **0.1 kg**

DESCRIPTION

The console 200.1 S75 creates the mounting point on a 200.1 series extraction and filtration unit for an Alsident System 75 extraction arm. The arm is then carried directly on the unit, without a separate bench base or wall bracket, and the capture point stays mobile together with the unit.

BENEFITS

- Mount for Alsident System 75 extraction arms directly on the unit
- Self-assembly, assembly material and tools included
- Base tubes come with the Alsident arms, no additional part required
- Saves floor space because no separate arm base is needed at the workstation

TECHNICAL DATA

Item number	WL46536
Model	0200.1-Console.S75.01
Manufacturer	ULT
Manufacturer item number	0200.1-CONSOLE.S75.01
Order unit	piece
Arm system	Alsident System 75
Installation	self-assembly, material and tools included

APPLICATIONS

Retrofit or extension of an individual workstation where the extraction arm should sit directly on the mobile extraction unit, for example at soldering, bonding or laboratory benches that change location.

COMPATIBILITY AND SCOPE OF DELIVERY

Suitable for extraction and filtration units of the ULT 200.1 series, with a maximum of one console per unit. The console is supplied with assembly material and assembly tools. The Alsident System 75 extraction arm is ordered separately and its base tube is included with the arm.
