

LIGHT4Vision LV3191. LED battery light Reverse, 2800-5500 K, dimmable, rechargeable, white/grey

Item no. WL51574

Manufacturer Light4Vision

LED battery light Reverse, 2800-5500 K, dimmable, rechargeable, white/grey

TECHNICAL DATA

Colour	White
Weight	0.1 kg

DESCRIPTION

Practical and stylish lighting: The Reverse Battery Light can be used flexibly at any location and creates numerous lighting effects. Different colour temperatures (5500 K on one side, 2800 K on the other) can be used playfully in addition to 5 dimming levels by positioning the light. With the help of the enclosed USB cable, the battery can be charged conveniently, e.g. on a laptop, in the car or with a power bank (max. 5 V). The battery life is up to 24 hours at medium intensity. A handle at one end of the cylindrical lamp allows for convenient carrying and hanging.

The Reverse battery light at a glance:

- Rechargeable with included USB cable
- With gravity sensor
- LED light source
- 5 dimming levels
- 5500 K (daylight) on one side, 2800 K on the other side
- Width 8,5 cm
- Height 20 cm
- Weight 300 g
- Colour white / grey
- 2 years warranty

PRODUCT DETAILS

item number	WL51574
manufacturer	LIGHT4VISION
manufacturer item number	LV3191
width	85 mm
height	200 mm
order unit	piece
Lamp or magnifier type	workplace light
Illuminance	400 LUX
connections	USB
dimnable	yes
colour temperature	5500 °K
housing colour	white/grey
luminant	LED
ESD safe	no
