

Polarising Filter Set for LED Ring Lights of the RL12 Series - Starlight 100-007726

Item no. STL-100-007726

Manufacturer Starlight

Polarising filter set for RL12 series ring lights. Through polarisation it suppresses disturbing reflections and glare on mirror-like surfaces for higher-contrast viewing.

TECHNICAL DATA

Weight **0.1 kg**

DESCRIPTION

The Starlight polarising filter set is an accessory for the RL12 series LED ring lights. Through polarisation it reduces reflections on shiny and mirror-like surfaces.

BENEFITS

- Suppresses disturbing reflections and glare
- Higher contrast on mirror-like test objects
- Fits RL12 series ring lights

TECHNICAL DATA

Type	Polarising filter set
Compatibility	RL12 series
Manufacturer	STARLIGHT
Manufacturer part no.	100-007726
Sales unit	piece

APPLICATIONS

For microscopy and quality control of reflective components such as metal, glass or plastic.
