

Dispensing needle 22 G, conical blue, inner Ø 0.41 mm, 10 pcs - JBC ND22P

Item no. WL51606

Manufacturer JBC

Stainless steel dispensing needle 22 G with 0.41 mm inner diameter for precise dosing of type 3 solder paste. Total length 32 mm, supplied as a box of 10.

TECHNICAL DATA

Colour	Blue
Country of Manufacture	Spain
HS-Code	85159080900
Weight	0.1 kg

DESCRIPTION

The JBC ND22P dispensing needle applies solder paste, flux or adhesive to the PCB in a controlled, repeatable way. Its 0.41 mm inner diameter suits the dosing of type 3 solder paste in fine SMD applications.

BENEFITS

- 0.41 mm inner diameter for a defined, consistent paste volume
- Gauge GA 22, matched to type 3 solder paste
- Conical tip shape for accurate spot application
- Total length 32 mm, compatible with standard dispensing syringes
- Supplied as a box of 10 for uninterrupted work

TECHNICAL DATA

Article no.	WL51606
Model	ND22P
Manufacturer	JBC
Manufacturer article no.	ND22P
Gauge	GA 22
Inner diameter	0.41 mm

Tip shape	conical
Total length	32 mm
Recommended solder paste	type 3
Pack quantity	10 pieces

APPLICATIONS

Manual and semi-automatic dosing of solder paste, flux and low-viscosity adhesives in SMD assembly, repair and rework.

COMPATIBILITY AND SCOPE OF DELIVERY

Fits common Luer lock dispensing syringes and JBC dispensing systems. Scope of delivery: 10 dispensing needles 22 G (blue).

RoHS compliant. Manufactured by JBC, Spain.
