

## Stripping tip 20 AWG (0.81 mm), W140 series for WS140 stripping tweezers - JBC W14020G

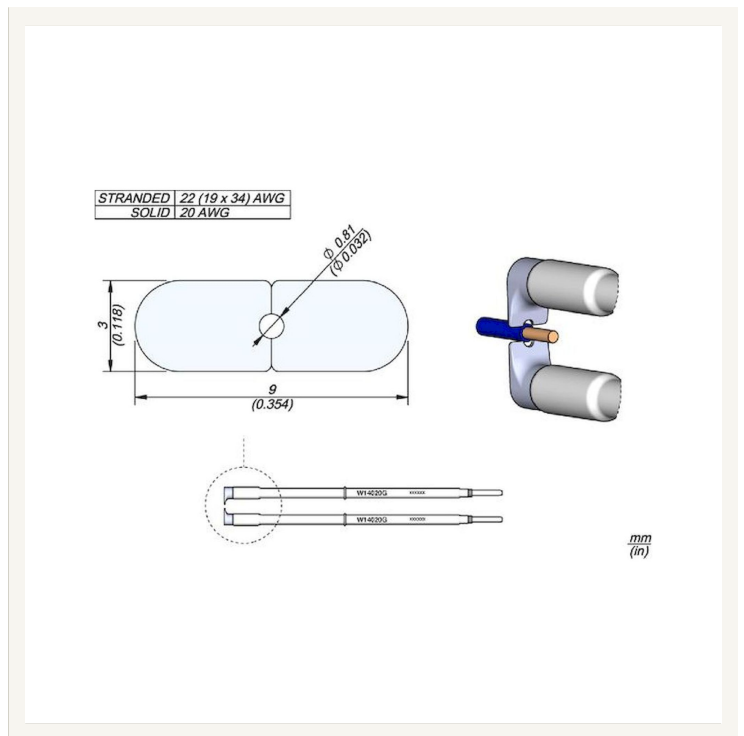

Item no. WL63465

Manufacturer JBC

High-temperature stripping tip W14020G of the W140 series for cables with 20 AWG (0.81 mm / 0.0319 in) made of thermostable materials such as Teflon, Kapton or silicone rubber. Works with the WS140 precision stripping tweezers with adjustable stripping length.

### TECHNICAL DATA

|------------------------|------------------|
| Ausführungsklasse      | ESD (antistatic) |
| Country of Manufacture | Spain            |
| HS-Code                | 85159080900      |
| Series                 | W140             |
| Weight                 | 0.1 kg           |

### DESCRIPTION

Stripping high-temperature cables made of thermostable materials calls for a precisely sized tip that removes the insulation cleanly without damaging the conductors. The W14020G is specially designed for cables with 20 AWG (0.81 mm / 0.0319 in) made of materials such as Teflon, Kapton or silicone rubber.

### BENEFITS

- Suited to a conductor cross section of 20 AWG (0.81 mm / 0.0319 in).
- Designed for thermostable insulation such as Teflon, Kapton and silicone rubber.
- Works with the WS140 precision high-temperature stripping tweezers with adjustable stripping length.
- W140 tip series for repeatable, clean stripping.

| Suitable handpiece | WS140 |
| Order unit         | piece |

## APPLICATIONS

Stripping high-temperature and special cables in aerospace, medical, military and laboratory applications.

## COMPATIBILITY & SCOPE OF SUPPLY

Fits the JBC WS140 stripping tweezers. Scope of supply: both stripping tips included.

Manufactured by JBC, origin Spain.
