

Abgeschrägte Lötspitze Ø 3,8 mm C245 - JBC C245797

Item no. WL71614 **Manufacturer** JBC
Manufacturer no. C245797

JBC C245797 bevel soldering tip, Ø 3.8 mm, reduced tinned surface for touch-ups. C245 series for all T245 irons.

TECHNICAL DATA

Article authenticity	Original product
Condition of article	New
Country of Manufacture	Spain
HS-Code	85159080900
Serie	C245
Weight	0.008 kg

DESCRIPTION

Bevel soldering tip with 3.8 mm diameter and a reduced tinned surface, ideal for touch-ups and rework. The tip belongs to the C245 cartridge range, JBC's widest, and works with every T245 soldering iron. It suits general soldering, SMD components and high-power joints such as ground planes.

Benefits

- JBC Long Life Tips: instant heat-up and excellent heat transfer
- Up to 5 times longer life than common tips thanks to the JBC Most Efficient Soldering System
- Station Sleep and Hibernation modes protect the tip and save energy
- Part of the largest C245 shape range for almost any soldering task

Applications

General soldering, SMD assembly and high-power joints such as ground-plane soldering.

Compatibility and scope of supply

Fits all JBC T245 soldering irons. Supplied as a single piece. Made in Spain.
