

Meißel-Lötspitze 6,6 x 1,8 mm verstärkte C245E-Serie - JBC C245968E

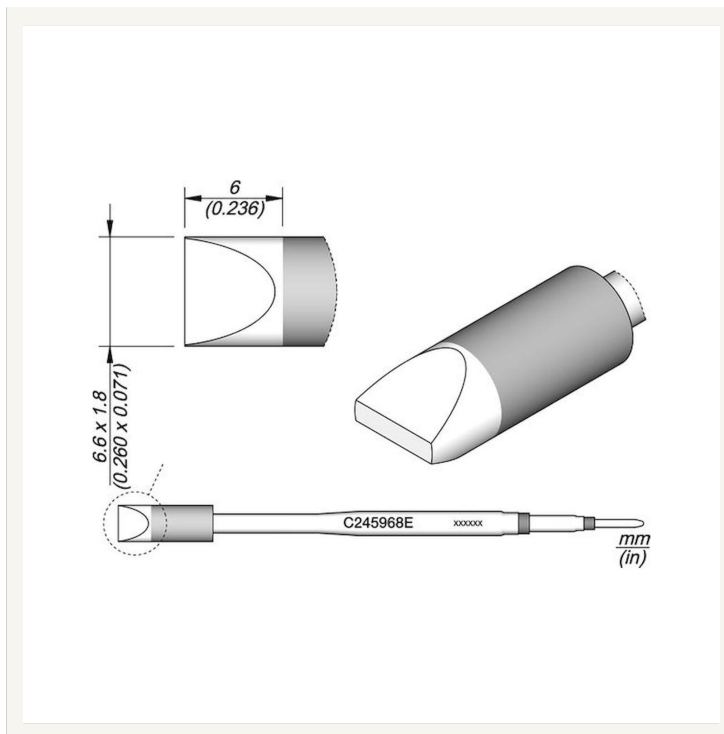

Item no. WL71615

Manufacturer JBC

JBC C245968E chisel soldering tip 6.6 x 1.8 mm, reinforced C245E series with a thicker iron layer. For tough series work on T245 irons.

TECHNICAL DATA

Country of Manufacture	Spain
HS-Code	85159080900
Serie	C245
Weight	0.008 kg

DESCRIPTION

Chisel soldering tip 6.6 x 1.8 mm from the reinforced C245E range with a thicker iron layer for tough, repetitive series work. The tip belongs to the C245 cartridge range, JBC's widest, and works with every T245 soldering iron. It suits general soldering, SMD components and high-power joints such as ground planes.

BENEFITS

- JBC Long Life Tips: instant heat-up and excellent heat transfer
- Up to 5 times longer life than common tips thanks to the JBC Most Efficient Soldering System
- Station Sleep and Hibernation modes protect the tip and save energy
- Part of the largest C245 shape range for almost any soldering task

APPLICATIONS

General soldering, SMD assembly and high-power joints such as ground-plane soldering.

COMPATIBILITY AND SCOPE OF SUPPLY

Fits all JBC T245 soldering irons. Supplied as a single piece. Made in Spain.

TECHNICAL DATA

Item no.	WL71615
Manufacturer	JBC
Manufacturer item no.	C245968E
Tip series	C245
Tip shape	meißelförmig / chisel / tournevis
Tip alignment	gerade / straight / droite
Suitable handpiece	T245
Size / iron layer	6,6 x 1,8 mm / verstärkt (E)
Package dimensions	110 x 12 x 12 mm
Net weight	0,008 kg
Order unit	Stück / piece / pièce
