

Guide kit for solder wire 1.6 to 1.8 mm for AL250 soldering station - JBC GAL1618

Item no. WL71785

Manufacturer JBC

Replaceable guide kit for the JBC AL250 soldering station with automatic wire feed, sized for solder wires of 1.6 to 1.8 mm diameter. The kit can be swapped quickly depending on the solder wire used.

TECHNICAL DATA

Country of Manufacture Spain

HS-Code 85159080900

Weight 0.04 kg

DESCRIPTION

For a soldering station with automatic wire feed to deliver solder reliably, the guide has to match the wire diameter. This JBC guide kit is sized for solder wires of 1.6 to 1.8 mm diameter and can be swapped quickly on the AL250 depending on the wire in use.

BENEFITS

- Matches 1.6 to 1.8 mm solder wires precisely to the automatic feed of the AL250
- Quick, tool-free change when switching to another wire diameter
- Ensures even, jam-free wire delivery
- Light wear part at 0.04 kg net weight

TECHNICAL DATA

Manufacturer	JBC
Item number	WL71785
Manufacturer item number	0013915
Wire diameter	1.6 to 1.8 mm
Net weight	0.04 kg
Packaging dimensions (LxWxH)	245 x 185 x 45 mm
Order unit	piece

APPLICATIONS

Replacement and conversion part for the JBC AL250 soldering station with automatic wire feed when switching to solder wire of 1.6 to 1.8 mm diameter.

COMPATIBILITY AND SCOPE OF DELIVERY

Compatible with the JBC AL250 soldering station with automatic wire feed. Scope of delivery: 1 guide kit.

Manufactured by JBC, Spain. Compliant with CE and RoHS.
