- Bernstein 5015. Tool case PERFORMANCE without tools

Technical description

The PERFORMANCE case strikes a good balance between price and performance. Reduced to the most important functions, it represents an inexpensive alternative to PROTECTION. The use of X-ABS plastic with an extremely non-slip surface makes the case more resistant to external influences. The highly impact and fracture resistant material also makes the case airworthy, as it withstands the rough handling of checked baggage. The sturdy aluminium frame and the ratchet hinges with case lid locking complete the picture of a high-quality and at the same time functional tool case.
