

Bits and cutters of industrial and dental quality: Polishing agents (all measures in mm).

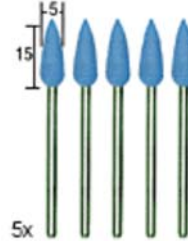

For gold, stainless, steel porcelain: Polishing agents

NO 28 293

NO 28 294

NO 28 288

Flexible silicon discs, wheels and bullets

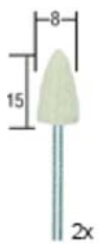

Used for surface smoothing and polishing of precious metals, non-ferrous metals, high-grade metals, glass, porcelain, wood, rubber and plastic. The bullets are very suitable for working tough-to-reach insides. Shafts of Ø 2.35mm.

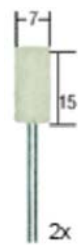

NO 28 295

Flexible polishing pad set

Especially suitable for working gold, platinum, silver as well as for tool making and castings. Shafts of Ø 2.35mm.

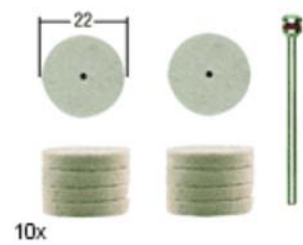

NO 28 801

NO 28 802

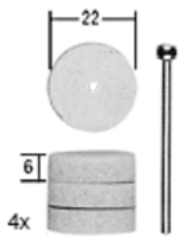

NO 28 803

NO 28 798

Felt polishers and felt discs

For preliminary and high burnish polishing of metal, gold, silver, brass and aluminium with the use of polishing paste. Also for final polishing in mould and die-making. Shaft Ø 2.35. Work with a lower rotational speed when polishing. Soften hard polishing paste with oil or heat up lightly.

NO 28 296

Special polishing discs

For surface smoothing and polishing of the cutting edges of Perspex and plexiglass. The edges are getting clean and plane. With arbor Ø 2.35mm.

NO 28 297

NO 28 298

NO 28 299

Cotton, chamois and felt polishers

For high burnish polishing of metal, gold, silver, non-ferrous metals, brass, aluminium, ceramics and porcelain with the use of polishing paste. Also for reconditioning painted woods and plastics. Shaft Ø 2.35mm.

NO 28 292

Polishing paste

Absolutely essential for polishing metal and plastic.
