

Compact, light and well balanced. With an extra powerful drive for a high material removal capacity.

Belt sander BBS/S

Powered by a strong special DC motor, quiet and durable.

Left-aligned sanding belt allows for sanding right into corners. Fine adjustment of rollers prevents the belt from lateral roll-off. Easy replacement of bands without need for tools as rollers are under spring tension. Housing is made of glass-fibre reinforced POLYAMIDE. Supplied with each five 150 grit and 240 grit sanding belts. In addition, a screw clamp for stationary use. Packed in an attractive case as described above.

Technical data:

230V. 150W. Grinding band 40 x 260mm. Grinding surface 60 x 40mm, band speed 160m/min. Length 175mm. Weight 700g. Class 2 insulation.

NO 28 526

| NO 28 922 | 80 grit | 5 pieces |
| NO 28 924 | 150 grit | 5 pieces |
| NO 28 928 | 240 grit | 5 pieces |

Storage case of high-grade polypropylene. Attractive design, very sturdy and large enough to put the machine back in the case after completing work, without having to "fumble". A label on the side identifies the contents.

The BBS/S is also intended for stationary use. A screw clamp is included.

Five each 120 grit and 240 grit sanding belts are included.
